

Recent global supply chain disruptions, including those connected to the events in the Middle East, have resulted in significant increases in raw materials, energy, fuel, freight, and production. Despite our best efforts to minimize the impact, we must implement a companywide price increase. Please see the following details:

- **The increase will be effective May 8, 2026.**
- **RainBuster #700 and #850 will have an increase of 11.0% (current price X 1.11)**
- **All other RainBuster products on your price list will have an increase of 10.0% (current prices X 1.10).**
- **Orders received through May 7, 2026 will be at pre-price increase prices. Order quantities should be within normal cycles and no more than 10% larger typical recent size.**
- **The new Roofing Distributor Price List, effective May 8, 2026, is attached.**

Top Industrial will always do everything possible to manage through market volatility, supply constraints, and increases in costs. And we will minimize or avoid increases whenever possible.

All of us at Top Industrial-RainBuster appreciate your business and your understanding of this necessary increase. Please let me know if you have any questions.

Let me know what I can do to assist your efforts!
