

RE: SIKA THERMOTEK SUPPLY UPDATE

April 9, 2026

Dear Valued Customer

As we previously communicated, current global market conditions, including recent developments in the Middle East, have disrupted the global supply chain, causing increases in Sika's cost of raw materials, logistics, energy, and production. Despite our efforts, Sika is unable to fully mitigate all the impacts from these external forces.

To cover the increased costs on our business, Sika will be implementing price adjustments on the following products:

Due to these impacts on our costs, our products will increase 8%, effective April 15th.

We want to assure you that these measures are not taken lightly. Our teams continue to try to mitigate the impact including through sourcing strategies, operational efficiencies, and proactive inventory planning. Unfortunately, these actions cannot fully offset the cost increases we are experiencing.

Sika remains committed to supporting your projects and ensuring continuity of supply. Your Sika representative is available to answer any of your questions.

Thank you for your understanding and for being a valued customer.

Sincerely,

Sebastien Goddard
