To: Atlas Polyiso Roof and Wall Insulation Customers

Subject: Freight Surcharge

Due to continued tightening in the flatbed truck market, we are implementing an increase to our freight surcharge. Carrier capacity remains extremely limited, and competition for available trucks has driven transportation costs significantly higher.

While we make every effort to manage these costs, the current environment requires us to adjust our surcharge to more accurately reflect the increased cost of securing reliable freight services. We appreciate your understanding and continued partnership.

The following freight surcharges will be effective July 15, 2026:

- Deliveries of 0-200 miles from our shipping location – \$400.00
- Deliveries of 201+ miles from our shipping location – \$500.00

We appreciate your continued loyalty to Atlas.

Thank you,

Robert Ferree
Vice President/General Manager
Atlas Roof and Wall Insulation Division
