RE: Upcoming Freight Surcharge Adjustment

Dear Partners,

Like many in our industry, we are continuing to navigate rising freight, fuel, and logistics costs. To help offset these ongoing increases, we will be implementing an updated freight surcharge effective **September 28, 2026**.

Freight Surcharge	September 28
United States	\$1,100
Canada	\$1,300

Our team is focused on keeping your jobsite and warehouse deliveries running smoothly without interruption. To help us stay ahead of your supply needs, please let us know about any upcoming projects as early as possible so we can plan accordingly.

We truly appreciate your partnership and understanding. If you have any questions about how this impacts your upcoming orders, please reach out directly to your Area VP, Regional Sales Director, or local Siplast sales representative.

Thank you for your continued partnership,

Kirk Goodrum
General Manager, Siplast

Frank Griffith
VP, Siplast Sales
